Summary

B.Tech graduate with hands-on experience in full stack development, including Python and Django and data science. Proficient in building dynamic web applications, integrating backend logic with responsive frontends. Completed several capstone and individual projects. Strong teamwork, problem-solving, and communication skills, with a passion for continuous learning.

Skills

Languages: Python, C, JavaScript, HTML, CSS, Bootstrap

Web: Django, WordPress, SEO

Data Science: NumPy, Pandas, Matplotlib, Seaborn, ML Models, EDA

Deployment Tools: Git, GitHub, Tkinter, Postman

Professional Experience

Full Stack Developer Intern - Edure, Trivandrum

April 2025 – Present

- After successfully completing their Python Full Stack course, gaining hands-on experience in Django, frontend-backend integration, and full-stack project development.
- Progressed to the development team (Dexpro innovations pvt ltd), contributing to multiple demo projects and currently in a live project.
- Applied skills in building dynamic web applications, managing code using Git/GitHub, and collaborating in an agile development environment.

Front End Developer Intern - Brin'IT Digital LLP

5 Months

- Built responsive web interfaces with HTML/CSS/Bootstrap and WordPress.
- Improved SEO and website performance.

Data Science Intern - Edure

3 Months

- Performed EDA, data preprocessing, ML model development, and visualization.
- Done several capstone projects including German Credit Risk analysis

Projects

Enhancement and Implementation of Existing Grievance Redressal System (Live Project - Dexpro)

- Working on a live production system, integrating frontend and backend modules using **Django, Django REST Framework (REST APIs), HTML, CSS, Bootstrap, and JavaScript**.
- Developed and consumed **REST APIs** for authentication, data retrieval, and workflow management.
- Improved system features, optimized workflows, and ensured smooth user experience across different user roles.

HireHub

- Individual full-stack project: job and internship management platform built with Django, DRF, HTML/CSS/Bootstrap, and JavaScript.
- Enabled employers to post vacancies, candidates to apply, and admins to manage recruitment workflows efficiently.

Cyberbullying Detection System

- Django-based ML/NLP application using RNN/LSTM for real-time social media monitoring.
- Integrated automated email alerts to notify parents when potential cyberbullying is detected.

Education

B.Tech in Computer Science and Engineering

Muslim Association College of Engineering

APJ Abdul Kalam Technological University 2020 – 2024 | CGPA: 7.22 (First Class)
